

# Rollout

Rollout is a Vulcanized Composition Rubber (VCR) roll engineered to provide temporary protection for running track surfaces. Roll it out over an existing runway or track surface to protect the surface from cleats, spikes, motorized vehicles, and foot traffic. Re-roll it for easy storage. Rollout is a quick and effective way to protect your athletic surface. Rollout can be loose laid over asphalt, concrete, all-weather tracks and indoor hard surfaces for a temporary runway or to protect hard surfaces.

## MARKETS

- Sports
- Student Recreation

## APPLICATIONS

- Surface Protection
- Outdoor

## BENEFITS

- Slip-resistant when wet
- Protective
- Durable
- Portable

## PRODUCT INFORMATION

### DIMENSIONS

Thickness	Width	Weight
10mm	36", 48"	4.9 lbs/LF, 6.5lbs/LF
12mm	36", 48"	5.9 lbs/LF, 7.9lbs/LF
19mm	48"	12.5 lbs/LF

## ADDITIONAL INFORMATION

### Warranty

See Ecore Warranty Guide for warranty duration.

### Please Note

Rollout Runway is intended as a temporary surface covering, not as a permanently installed surface. Ecore is committed to sustainable manufacturing practices and the reuse of manufacturing products whenever possible to eliminate our waste stream. Because Rollout Runway is not intended as permanent flooring, but a protective cover, Ecore reutilizes first quality manufacturing excess as part of the formula for this product. This may result in visual irregularities, but does not affect the performance of the material.
